Annotated evidence-of-use demonstration

What evidence supports each selected limitation for a known product?

One fictional claim and one fictional controller, Model A v2.1. All excerpts and sources below are invented solely to demonstrate the method.

Selected limitation	Evidence / source	Assessment	Gap / next action
A controller receives a measured temperature from a sensor	“The controller accepts the sensor temperature signal.” Fictional manual A-01 §4.2, dated 2026-09-01; reviewed 2026-10-26	SUPPORTED: explicit description of the selected feature for the identified model	Verify the source applies to the product version under review.
The controller compares the measured temperature with a threshold	“Maintains the selected temperature automatically.” Fictional guide A-02 p.18, dated 2026-09-05	INFERENCE: regulation is described, but the comparison mechanism is not stated	Investigate technical documentation or agreed testing. Do not present the mechanism as observed.
The threshold is adjusted in response to a remote command	No source in the defined research set	UNRESOLVED: no supporting evidence located	Request further instructions. Absence of public evidence does not prove absence of the feature.

Interpretation and handoff

The assessment labels apply to individual limitations, not to an overall infringement conclusion.

A useful handoff includes the complete selected claim, citations, version applicability, contrary evidence and unanswered questions.

Limitations

This fictional excerpt does not establish infringement, claim construction, validity or compliance with any litigation standard.

Next review

Counsel and technical reviewers can use the gaps to decide whether further research is justified.

Discuss a real project

Tell us what you are trying to understand. We will discuss whether we can help, what information is available and how the work could be scoped.
